Fixed Dome Network Camera
FD8362/62E

2MP • Full HD • Smart Focus System • Vandal-proof

VIVOTEK FD8362/62E are professional fixed dome network cameras offering 2-Megapixel or 1080p Full HD resolution with superb image quality up to 30 fps. The cameras can capture a much more comprehensive area than a standard VGA model, significantly reducing the number of units required. It is especially suitable for monitoring wide open outdoor such as building entrances, airports or applications requiring accurate identification.

For installers, properly adjusting the focus of a megapixel network camera can be difficult due to the image detail. Thus VIVOTEK introduces the Smart Focus System including Focus Assist Button and Remote Focus to make installation and adjustment easier. VIVOTEK adopts lenses with built-in stepping motors that the installer can use to remotely control the focal length and precisely adjust the camera focus, offering hassle-free installation and maintenance.

The IP66-rated housing is designed to help the camera body withstand rain and dust and ensures operation under a multitude of harsh weather conditions. Its metal vandal-proof housing effectively provides robust protection from vandalism. Additionally, the wide temperature range further enhances the FD8362E's performance and reliability in extremely cold and warm weather.

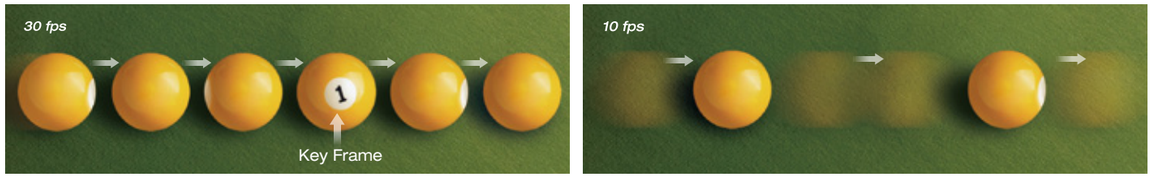
With other advanced features such as tamper detection, 802.3af compliant PoE, MicroSD/SDHC card for on-board storage, video cropping, and e-PTZ functionality, the FD8362/62E provide the most robust solution suitable for any demanding outdoor environments.

BUILT WITH RELIABILITY

1080p Resolution at Full Frame Rate

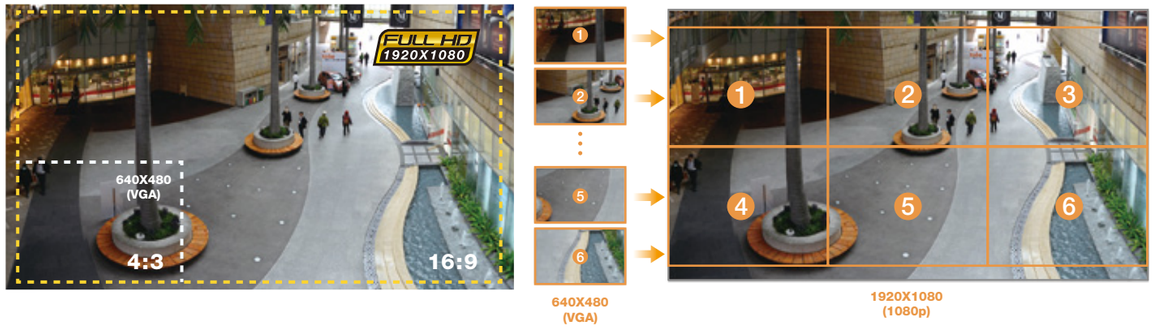
The VIVOTEK FD8362/62E are able to transmit 30 fps @ 1080p with H.264 compression, while conventional megapixel cameras generally only achieve 10 to 15 fps due to hardware limitations.

The ability to view and record footage at a full frame rate enables much more effective surveillance. For example, if a person or object of interest passes quickly through the camera's field of view during an event, a 10 fps frame rate might mean only a single frame with the target is captured, while the FD8362/62E would capture three frames, providing a fuller record of the event and more reliable identification of the target.



Wide Coverage, Exceptional Details

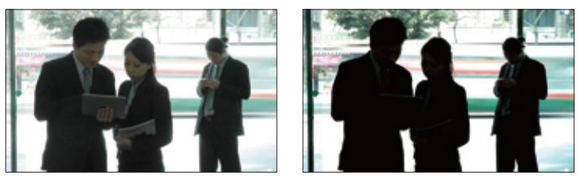
Compatible with the HDTV (16:9) standard, the FD8362/62E provide surveillance coverage for an area up to six times larger than possible with a VGA camera, significantly reducing the number of cameras required. The FD8362/62E are especially well suited to monitor broad spaces such as factories, warehouses, and building entrances. In addition, it is excellent for applications requiring accurate recognition for post-content analysis, such as the identification of people or license plates.



Consistent Surveillance Performance

- **Adapted for High-contrast Lighting Conditions**

When a camera is used in a high contrast, backlight, glare, or light reflective environment such as a building entrance, ATM, or window, a subject may appear dark and unrecognizable. WDR Enhanced technology compensates for the unbalanced lighting, restoring detail throughout the field of view, so as to give user unparalleled visibility to identify images.



With WDR Enhanced

Without WDR Enhanced

- **Clear Images 24/7**

The FD8362/62E deliver day & night functionality with a built-in removable IR-cut filter. By day, the IR-cut filter screens out infrared light to reduce color distortion, and at night, the filter is removed to accept infrared light for higher lighting efficiency.

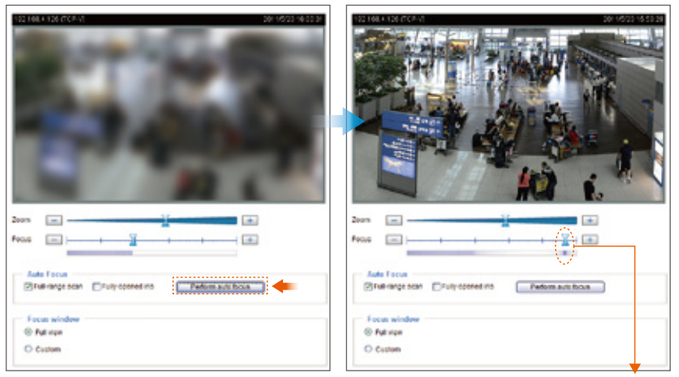
Smart Focus System

- **Remote Focus**

To make installation and adjustment easier, the FD8362/62E adopt lenses with built-in stepping motors that the installer can use to remotely control the focal length and precisely adjust the camera focus via the configuration webpage, offering hassle-free installation and maintenance.



Extreme Weatherproof

- **Wide Temperature Range (FD8362E Only)**

The wide temperature range (-40 °C~55 °C) enhances the FD8362E's performance and reliability under extremely harsh weather conditions.

- **IP66-rated Housing**

The weather-proof IP66-rated housing provides protection from dust and moisture, allowing the FD8362E to operate outdoors without any worries.

Enhanced Security

- **Vandal-proof IK10-rated Housing**

Equipped with a protective housing, the FD8362/62E are secured from vandalism, making it suitable for high-risk environments. The metal base and polycarbonate cover enable the FD8362/62E to withstand high impacts, thereby ensuring functional operation at all times.
